

Company Quality Policy

The Lifting Equipment Engineers Association (LEEA) is committed to the supply of services and products that meet the requirements and expectations of our membership and customers in every way.

The Association's vision is 'Lifting and height safety industries which have eliminated accidents, injuries, and fatalities', which is followed by our strategic priorities:

- Member benefits
- Defend the gold standard
- Raise awareness of our members
- Professional development of people across the industry
- Sustainable development
- Supporting the global industry

Maintaining the Quality Management System:

A major element of the Quality Policy is the maintenance of a Quality Management System, which is designed to conform to the requirements of ISO 9001:2015 plus all appropriate legislative requirements and industry related standards and codes of practice. LEEA is committed to the continual improvement of its Quality Management System.

Review:

This policy, procedures and documents supporting the Quality Management System are subject to review on a regular basis to ensure their continuing suitability and effectiveness making amendments where appropriate.

Communicating the Message:

This Quality Policy is communicated to all existing and new Company employees to ensure knowledge and understanding of its contents.

It is available to interested parties in the public area of the LEEA Website.

Signed:

date: 13/03/2023
